

The Impact100 SRQ grant funded an expansion of the Selby Preschool. With renovations and relocations of offices, the Selby Preschool will increase capacity by over 50%, adding an expanded therapy room to conduct speech, occupational, physical, and behavioral therapies to students on-site, during the school day. It also funded the purchase of new therapy room equipment including ramps, jungle gyms, climbing wall, gliders, swings, tumbling and landing mats, and weighted blankets, vests, and belts. With this expansion, equipment, and increase in services provided, they will reduce medical costs for families and provide safe, reliable care services that will allow a parent to continue working. thehavensrq.org
