

The Impact100 SRQ grant funded the purchase of a refrigerated truck, the payroll associated with hiring a licensed driver, fuel for the truck, insurance, ongoing maintenance, and signage to wrap the sides of the box. The vehicle will be wrapped with the Mayors' Feed The Hungry logo as well as our Impact100 SRQ logo.

The impact this will have on the community will be that having a refrigerated truck will provide perishable food items that would otherwise not have been available to our food pantries and would have been thrown away. This will have a significant impact on our local food pantries, and the families they serve, who will be receiving more food and a much greater variety of fresh food including milk, vegetables, and meats. The project will be sustained by providing for the operation and maintenance of the vehicle through an account that will be established for that purpose.
