

The Impact100 SRQ grant funded the renovation of the old early learning center at the YMCA of Southwest Florida (formerly The SKY Family YMCA). These renovations will allow them to increase their capacity by serving more children daily through programs that promote positive youth development. These improvements will also help the building become a safe place.

The impact this will have on the community will be that once these repairs are made the Y will be able to serve an additional 120 children daily. The renovated building will serve as an expansion of the early learning center and school-age care program. Four classrooms will be added to create more classroom space for three to five-year-olds. The project will be sustained by the increased capacity of the current early learning and school age care programs. The long-term sustainability of the project will be funded from program fees.
